

**DW125 Greebo Bloody Furious**

*When we were swamped with orders, during the closing period of the factory, we used up a batch of 39 plaster Greebos that had been left in a crate when the resin versions were introduced. They can be recognised by the logo, shown below, rather than the pewter hallmark used on the resin figures.*

**DW137 Pewsey Ogg without a puddle.**

*The infamous 'puddle' in which Pewsey Ogg is sitting was, in fact, a pool of yellow resin that was added when the figurine was completed. We heard, from some Collectors, that a few were packed and sold without the puddle.*
